

Product Update:

calcipotriol 50 micrograms/g and betamethasone 0.5mg/g
cutaneous foam (Enstilar[®]) SMC No. (1182/16)

Leo Pharma

05 August 2016

The Scottish Medicines Consortium (SMC) has completed its assessment of the above product and advises NHS Boards and Area Drug and Therapeutic Committees (ADTCs) on its use in NHS Scotland. The advice is summarised as follows:

ADVICE: following an abbreviated submission

calcipotriol and betamethasone cutaneous foam (Enstilar[®]) is accepted for use within NHS Scotland.

Indication under review: topical treatment of psoriasis vulgaris in adults.

Enstilar[®] cutaneous foam is another licensed formulation of calcipotriol / betamethasone and may be associated with a small budget impact.

Advice context:

No part of this advice may be used without the whole of the advice being quoted in full.

This advice represents the view of the Scottish Medicines Consortium and was arrived at after evaluation of the evidence submitted by the company. It is provided to inform the considerations of Area Drug & Therapeutics Committees and NHS Boards in Scotland in determining medicines for local use or local formulary inclusion. This advice does not override the individual responsibility of health professionals to make decisions in the exercise of their clinical judgement in the circumstances of the individual patient, in consultation with the patient and/or guardian or carer.

This assessment is based on data submitted by the applicant company up to and including 15 July 2016.

**Chairman,
Scottish Medicines Consortium**
