

Statement of Advice:

saxagliptin (Onglyza[®]) 2.5mg & 5mg film-coated tablets

(No: 958/14)

Bristol Myers Squibb / Astra Zeneca

07 February 2014

ADVICE: in the absence of a submission from the holder of the marketing authorisation

saxagliptin (Onglyza[®]) is not recommended for use within NHS Scotland.

Indication under review: monotherapy in adult patients aged 18 years and older with type 2 diabetes mellitus to improve glycaemic control inadequately controlled by diet and exercise alone and for whom metformin is inappropriate due to contraindications or intolerance.

The holder of the marketing authorisation has not made a submission to SMC regarding this product in this indication. As a result we cannot recommend its use within NHSScotland.

Advice context:

No part of this advice may be used without the whole of the advice being quoted in full.

This advice represents the view of the Scottish Medicines Consortium. It is provided to inform the considerations of Area Drug & Therapeutics Committees and NHS Boards in Scotland in determining medicines for local use or local formulary inclusion. This advice does not override the individual responsibility of health professionals to make decisions in the exercise of their clinical judgement in the circumstances of the individual patient, in consultation with the patient and/or guardian or carer.

**Chairman,
Scottish Medicines Consortium**
