

travoprost 0.004% / timolol 0.5% eye drops (Duo trav^o) (No. 294/06)
Alcon Laboratories (UK) Ltd

Product Update

7 July 2006

The Scottish Medicines Consortium has completed its assessment of the above product and advises Area Drug and Therapeutic Committees (ADTCs) on its use in NHS Scotland. The advice is summarised as follows:

ADVICE: following an abbreviated submission

Travoprost/timolol (Duo trav^o) eye drops are accepted for use in NHS Scotland for whom this is an appropriate combination of agents. They decrease intra-ocular pressure in patients with open-angle glaucoma or ocular hypertension who are insufficiently responsive to topical beta-blockers or prostaglandin analogues alone.

There is no significant additional cost associated with the combination product compared with the individual components and it allows patients to administer fewer drops.

Advice context:

No part of this advice may be used without the whole of the advice being quoted in full.

This advice represents the view of the Scottish Medicines Consortium and was arrived at after evaluation of the evidence submitted by the company. It is provided to inform the considerations of Area Drug & Therapeutics Committees and NHS Boards in Scotland in determining medicines for local use or local formulary inclusion. This advice does not override the individual responsibility of health professionals to make decisions in the exercise of their clinical judgement in the circumstances of the individual patient, in consultation with the patient and/or guardian or carer.

This assessment is based on data submitted by the applicant company up to and including 10 July 2006.

**Vice Chairman,
Scottish Medicines Consortium**
